

GREEN LABS CERTIFICATION: GETTING STARTED

There's more than one way your work can benefit our community.
Make the footprint of your work greener by working with UVA Green Labs.

1

Schedule a meeting: Email the Green Labs Specialist at greenlabs@virginia.edu - scan here! →

2

Establish your baseline: Fill out the Certification form to figure out where you're starting.

3

Team up: Review that baseline with your team and use the Green Lab Certification Credit Tracking document to decide which credits you want to tackle and who will take the lead on them.

4

Reach out: When you need stickers, resources, or encounter a barrier, check out our website and connect with the Green Labs Specialist to get support.

5

Training: When your Certification form is mostly complete, send it to the Green Labs Specialist for review and schedule your lab's sustainability training. The whole group will learn more about sustainability at UVA and review any changes in the lab's practices as a group.

6

Submit: After your group's training, review the Certification document together before submitting it to the Green Labs Specialist and scheduling your plaque delivery.

7

Celebrate! We'll mark this achievement by taking photos, handing out beaker mugs to everyone in the lab, and giving you a plaque to display outside your lab.
